EDUCATION

Indian Institute of Information Technology Ranchi

Bachelor of Technology in Computer Science and Engineering

2023 – 2027

CGPA: 8.02/10.0

EXPERIENCE

Full Stack Developer Intern

CreditSea

Sep 2025 – Oct 2025

Remote

- Developed a completely new Notification Model for push notifications, including **10+** new backend services, cron jobs, and scheduling systems
- Worked with cross-functional teams to design and develop RESTful APIs serving **50,000+** daily users
- Optimized database queries using pipelining resulting in **60%** faster response times
- Improved admin panel UI and resolved **20+** bugs across applications to enhance stability and user experience

PROJECTS

Chatter – Real Time Chat Platform | [Live Link](#) | [Source Code](#)

July 2026

Next.js, Node.js, Prisma, Socket.io, RabbitMQ, AWS EC2, Nginx

- Architected a **microservices-based** real-time chat platform, separating user authentication, live messaging, and background tasks to ensure high scalability
- Engineered a secure OTP authentication flow, implementing **rate limiting via Redis** to prevent spam requests and utilizing **RabbitMQ** to asynchronously queue email delivery
- Built seamless live messaging using **Socket.io** with dynamic typing indicators and read receipts, optimizing database operations and data modeling with Prisma ORM
- Deployed the full-stack application on an **AWS EC2** instance, configuring an **Nginx reverse proxy** to securely route REST API and WebSocket traffic through a **Cloudflare domain**

Lernix Learning Platform | [Live Link](#) | [Source Code](#)

April 2025

React.js, Node.js, MongoDB, Express.js, Redis, Clerk, Stripe

- Engineered a full-stack e-learning platform enabling educators to publish courses and allowing students to enroll and track their progress in real time
- Implemented **Redis caching with automated cache invalidation** to reduce database read operations, accelerating course fetching on the landing page
- Integrated Clerk for secure, role-based authentication separating student and educator workflows, and utilized **Stripe Checkout** to process secure course payments and track earnings
- Utilized Cloudinary for optimized media delivery and developed an **educator dashboard** to visualize total revenue, student enrollments, and detailed course analytics

TECHNICAL SKILLS

Languages: C++, Java, JavaScript, TypeScript, Python, SQL, HTML, CSS

Frameworks & Libraries: React, Redux, Next.js, Node.js, Express.js, GraphQL, Tailwind CSS, TanStack Query

Databases: MongoDB, PostgreSQL, SQLite, Redis, Convex

Cloud & DevOps: AWS (EC2), Nginx, PM2, Cloudflare, Docker, Linux, Vercel, Firebase

Developer Tools: Git, Postman, Prisma, Socket.IO, RabbitMQ, Zustand

CS Fundamentals: Microservices, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

ACHIEVEMENTS & CODING PROFILES

- Solved **1400+** **DSA problems** across LeetCode, Codeforces, GeeksforGeeks, and more.
- LeetCode: Max Rating **1828** | Codeforces: Pupil | CodeChef: 3-star
- Participated in **100+** online competitive programming contests.
